

“Eyes are the window to the soul”

About Us

Long has this been said highlighting how the ancients knew the importance of eyes to our body. Our eyes are one of the most sophisticated yet the most exposed organ of our body, open to the entire world , to all its beauty and therefore vulnerable to numerous challenges. At Sreenethra Eye Care, we have a system that screens for any eye abnormality all the way from computer eye strain to cataract, glaucoma and retinal disorders. Let us take care of your eyes.

- **Refractive Errors/ Eye Strain:**
- **Cataracts**
- **Dry Eyes and Corneal Disorders**
- **Glaucoma & Other Retinal Diseases**

Bakery Junction, Nandavanam Road,Thiruvananthapuram, Kerala. India.

For Refractive Errors/ Eye Strain

Uncorrected vision problems can cause immense eye strain when doing regular tasks and using the screen. Our adept optometrists and refractive station will help you get glasses checked and advise suitable eye wear for digital eye strain.

Vision Testing

Color Vision Testing

Orthoptics

For Cataracts

Cataracts are a result of the ageing of the natural lens of the eye. It can decrease vision , cause glare and disrupt daily activities like reading and driving. Our cataract workstation is a part of the executive health check up where you can screen for this preventable cause of visual loss.

Slit Lamp Examination

Biometry

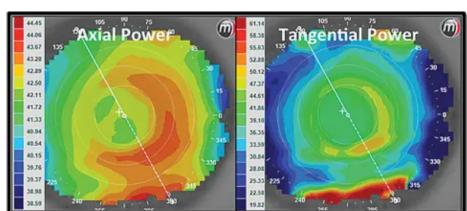

Anterior Segment Photography

For Dry Eyes And Corneal Disorders

Dry eyes and other corneal disorders and degenerations can be evaluated and treated by a few simple and sophisticated tests at the hospital. This is a common problem affecting computer users, allergic individuals and people with systemic diseases.

Non Invasive TBUT

Topography

Specular Microscopy

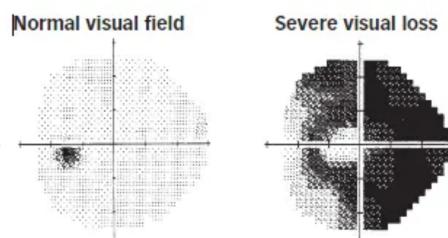

For Glaucoma

Glaucoma is uncontrolled rise in the pressure of the eye. It causes peripheral visual defects, and in advanced cases, pain and blindness. It can also run in families. You can discover if you're prone to this disease and institute corrective measures at our hospital.

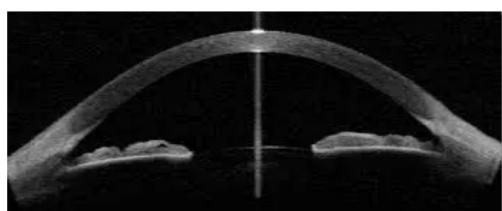

Intraocular Pressures

Visual Field Analysis

Anterior Segment OCT

For Retinal Disorders

Diabetic retinopathy is a common infliction of the retina in diabetics, that can slowly creep up even in those with good blood sugar control. So does age related macular degeneration. Get peace of mind by ruling out these visually debilitating condition in your eye with our advanced imaging systems.

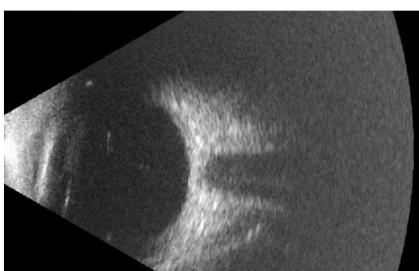

Biomicroscopy

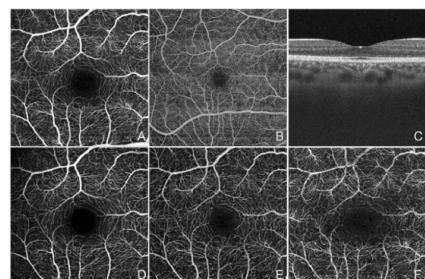

OCT macula

Ultrasound Bscan

OCT Angiography
